

WERTICAL BALLERS

Workhorses of the Industry

Solid Performance You Can Depend On, Year After Year

Max-Pak's Vertical Balers are known for their work ethic...year after year, after year. And it's no wonder, with Max-Pak's heavy duty construction and our better-than-it-has-to-be approach to electrical and hydraulic components. The first balers we ever made were Verticals, and we learned how to build them the right way by putting our balers to work in our own

recycling facility. It's fair to say we KNOW Vertical balers, and our

customers benefit from that knowledge every day. With 11 different models to choose from, Max-Pak has a Vertical baler to fit your needs – a solid, dependable workhorse for many years to come.

Side Mount Vertical Balers Offer A New Standard in Serviceability

The Max-Pak Vertical Side Mount balers now offer superior ease of access to power unit components, including the oil tank, motor, hydraulic valve, control panel and junction box. A simple 4-bolt mount allows removal of the entire power unit in minutes for service. Power Unit "cores" may also be returned to Max-Pak for full factory refurbishment, and a core replacement program is available.

The new "Quick Exchange" Power Units are standard on the MP60HD-15 and available on most Max-Pak Vertical Balers.

The Max-Pak Vertical Side Mount power unit features easy service access. Most components can be reached without the use of a ladder, and simple 4-bolt mounting allows removal of the entire unit in minutes.

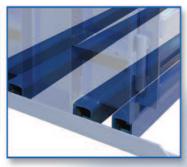

Max-Pak vertical balers now feature a touch screen interface for operator controls and user feedback...the first of its kind in the industry.

Our vertical balers are designed to survive years of punishment, with structural features like 12inch header beams and 10-inch side channels.

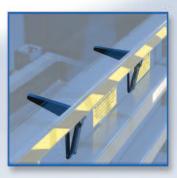

Tube steel reinforces the discharge door and maintains the integrity of the bale chamber. Other balers typically use channel steel for the discharge door.

Subfloors are constructed of 4 pieces of 4-inch tube steel, for the best foundation in the industry.

Platen roller guides ensure smooth operation.

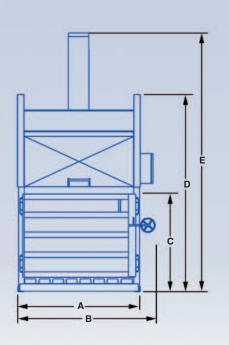

Spring loaded 6-inch dawgs maintain bale integrity during baling process.

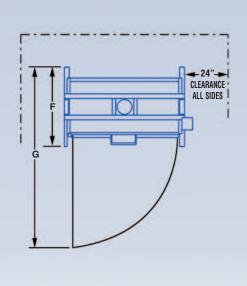

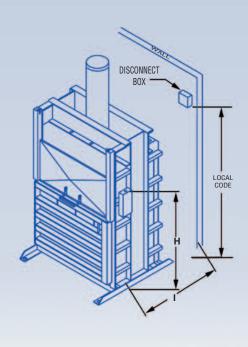

10-inch ratchet wheel is easier to operate than 6 or 8-inch wheels.

MAX-PAK VERTICAL BALER SPECIFICATIONS											
BALER MODEL	BALE SIZE	BALE WEIGHT (lbs.)	CYCLE TIME (No Load)	MOTOR	PUMP	CYLINDER	SYSTEM PRESSURE	RAM PRESSURE	PLATEN PRESSURE	OIL CAPACITY	SHIPPING WEIGHT (Approx)
MP48HD-10	30 x 48 x 48	Up to 900	60 Seconds	10hp 208/230/460v 3ph	9.8 GPM	6" Bore 3.5" Rod 48" Stroke	2200 PSI	62,203 lbs.	48.29 PSI	30 Gallons	4700 lbs.

The Max-Pak Difference

Since 1976, Max-Pak has been making quality balers and compactors for the waste industry. It was something we had to do. You see, we're also in the waste paper recycling business, and 32 years ago we couldn't find a baler that performed the way we needed. So we built our own.

Being in the waste business has its advantages when you're designing a baler. Not only do we understand the challenges and demands expected from a baler, we get to test and fine tune our ideas in a real working environment – our own.

For our other baler customers, it means they get the benefit of our front-line experience and our determination to build only the best. A Max-Pak baler is not good enough for our customers unless it's good enough for us.

At Max-Pak we take a personal interest in every machine we sell, and every customer we serve. It comes from our small town heritage. It's who we are. So it also makes sense that we deliver and install every baler ourselves, and then train your operators before we leave. We want you to be a friend and a Max-Pak customer for a long time. That's part of our small town, small company mentality.

But make no mistake. Max-Pak is no lightweight when it comes to balers. You'll find our equipment in some of the most demanding industries, with some of the most particular companies.

Our customers have come to know and trust Max-Pak for productivity, reliability, and integrity. So it's no surprise that over 90% of all Max-Pak balers ever built are still on the job. And we plan to keep it that way.

Max-Pak Offers A Full Line of Baling and Recycling Equipment
